

Chris Howarth

Email: cthowarth@gmail.com

I am a First-Class Honours Computing and I.T graduate with 2 years of software engineering experience through a leading digital-first public service broadcaster. I am a highly organised and driven individual enjoying a challenging and rewarding career in software engineering. I am currently seeking a software engineer or cyber security position in an organisation that likes to promote innovation and will support me while I build upon my existing skills.

Relevant Work History

Graduate Software Engineer

BBC

Sept 2022 – Present

- Joined at the level of a junior software engineer
- Completed rotations in different departments the BBC to get a broad understand of the technologies and frameworks used to deliver a first-class customer service
- Taken ownership of various tickets relating to front and backend work
- Led and organised meetings with colleagues from different areas of the organisation to develop a better understand of the objectives of certain areas of work
- Arranged code reviews for work that I had completed to release to the production environment with minimal issues
- Worked with team members to resolve urgent outages that effected the customer experience
- Gained experience of working with AWS, Jenkins and other bespoke backend software unique to the BBC
- Currently working within the BBC Web Platform Team, which is responsible for the deployment of primary BBC frameworks with native AWS technologies
- Developed various front-end components while working with the BBC Sport Data team and BBC Live team using JavaScript, React and Typescript
- Previously worked with BBC Sport Mobile team, gaining experience working with typescript, Swift, Kotlin and various other technologies and procedures relevant to mobile app development.
- Member of the BBC Security Champions network and attend bi-weekly meetings provided by the internal security Guild
- Completed courses provided by the BBC academy in Test-Driven Development, Advanced Typescript, Swift, and Threat Modelling.

- Organising staff rotas
- Training current staff to maintain high levels of care

Key Skills

- **Front-end Development:** I have a good understanding of **JavaScript**, **Typescript**, **React**, and the concepts of functional programming. I have developed various components as part of teams within the BBC that have been release to the production environment. I have also worked previously in mobile app development, specifically using **swift** and **iOS**.
- **Back-end Development:** I have intermediate knowledge of the **Python** and **Java** programming languages (I achieved excellent grades in OOP during my degree). I have also worked with several **AWS technologies**, including Codebuild, Codepipeline, Cloud formation, the AWS CDK, Cloudwatch, AWS lambdas, Step functions, S3 and Cloudtrail.
- **Customer Service:** Most of my working history has involved some level of customer service. I have often been the first point of contact for a customer regarding any queries or complaints. During the last 4 years I have prided myself on delivering an excellent and friendly level of customer service.
- **Sales:** Have developed excellent sales skills in my previous position at CIS and have received training on talking and selling positive. This has resulted in a friendly sales service in which I believe I build an excellent rapport with the customer before selling a product which best suits their needs.
- **Communication & People Management:** I am a confident and effective communicator of information. I developed these skills in previous roles in management, both when self-employed and as an area organizer. I have experience dealing with individuals from a variety of cultural and generational backgrounds.
- **Organisation and Flexibility:** Excellent organisational skills which I have demonstrated in every role I have had. These skills have been particularly useful during my current studies to become a software engineer.
- **Other I.T.** Frequently use several Microsoft Office programs such as **Word**, **Excel**, **Access** and **Power point**. Also have experience of **Oracle** and bespoke programs such as **E-sentinel**. Extensive knowledge of statistical packages such as **SPSS**, and regular use of a

variety of email clients such as **Outlook**. Completed courses in Spreadsheet Applications and Word Processing.

Additional Certificates

(Awarded through Open University)

- Certificated of Higher Education in Computing and IT

(Awarded through UCLan)
